

Amendments to the Abstract

Replace the abstract with the following replacement abstract:

~~The invention relates to a~~ A rotary printing press ~~comprising~~ has at least one inking roller ~~(3, 4)~~, which transports printing ink~~[[,]]~~ ~~composed essentially of~~ that includes pigments and solvent, from an ink reservoir ~~(2, 12)~~ towards the material to be printed ~~(5)~~. The intensity of colour on the material to be printed ~~(5)~~ is adjusted by means of the mixing ratio of pigments to solvent in the ~~colour~~ ink that is transferred to the material to be printed ~~(5)~~. The mixing ratio of pigments to solvent in the ink can be ~~influenced~~ regulated by a device that aids the evaporation of the solvent~~[[,]]~~ ~~said device acting on~~ from one of the inking rollers ~~(3, 4)~~.
